# **THERMAGLIDE<sup>®</sup>** INSULATED ROLLER GARAGE DOORS

[www.thegaragedoorcompany.ltd.uk](http://www.thegaragedoorcompany.ltd.uk)

RAISING THE QUALITY - LOWERING THE PRICE

Thermaglide® has been manufactured for over 25 years. Our technology and expertise has resulted in the continuing success of Thermaglide® throughout that time and will continue long into the future.

Our team of fully-qualified employed engineers can offer you high quality, affordable and stylish garage doors to complement your home.

The wealth of knowledge and skills our dedicated teams of installers provide is unrivalled and as our focus is on offering a fantastic customer experience, we have a great reputation for excellent customer care.

## No other door is quite like Thermaglide®

Thermaglide® takes the concept of the roller garage door to a new level. It out-performs the ordinary garage door for ease of use, insulation, finishes, safety and security plus all doors are manufactured under ISO 9001 quality guidelines.

Two designs are available - the Thermaglide®77 which is the ultimate in remote control luxury, and the ultra-compact Thermaglide®55, the solution for tight spaces, which is available in the remote control version.

## Safety Conscious

The safety of our products is paramount. Your driveway can be a busy place - the safety of your garage door may be the last thing on your mind - with the Thermaglide® range **safety is built in**. The sensitive safety edge and motor load monitoring circuitry quickly detects obstructions, stopping and reversing the door.

### 1. Manual Override

A connector and crank handle are supplied as standard, so your door can be opened, from inside, even during a power cut.

### 2. Headroom

The option of either a full box or a half box (as shown) provides flexibility in those instances where headroom maybe an issue.

### 3. Control System

An interior light that is controlled by an in-built timer unit is provided within the self contained control box.

### 4. Guide Rails.

Guide rails made from aluminium profile with a polyester finish.

### 5. Safety Edge

Supplied as standard. At the bottom edge of your door is an emergency sensor which will stop and reverse when the door is in operation, if it senses an obstruction.

### 6. Alarm

The option of a 90+ decible alarm is available.

## Part of your Home

Thermaglide® is designed to give **thermal and acoustic insulating properties much higher than the average garage door**.

Foam filling in the door curtain plus high performance weather sealing ensures good insulation - perfect if you want to use your garage as a work/play room or your garage is under a bedroom.

## Convenient, Automatic

Thermaglide® roller garage doors operate vertically, rolling into a compact coil within the garage, above the opening. Not only does this mean you can park

right up to the garage door, but valuable space is not taken up inside your garage which could be used for storage.

Roller doors are suitable for garage openings of all shapes and sizes even arched doorways. With **remote control as standard**, operation couldn't be easier and the built-in courtesy light will guide your way.

## Extremely Secure

The combination of side runners and auto-positive locking with anti-lift geometry locking straps makes Thermaglide® extremely secure. Our garage doors are fully automated so there is no lock to pick or force! Rolling code technology in the control system ensures criminal "code grabbing" is eliminated.

## Unrivalled Peace of Mind

**10** 10 YEAR WARRANTY EXTERIOR FINISH\*  
\*see website for full terms and conditions

**5** 5 YEAR WARRANTY MOTOR\*  
\*see website for full terms and conditions

**2** 2 YEAR WARRANTY MANUFACTURE DEFECTS\*  
\*see website for full terms and conditions

All Thermaglide® doors are CE marked, building regulations compliant and conform to: BSEN13241-1:2003.

**Insist on CE marked products for your own peace of mind - we won't supply anything that isn't!**

# THERMAGLIDE® 77

## The Ultimate Choice

Because it rolls **tighter** than other roller doors, Thermaglide®77 takes up less headroom when open - just 270mm for most door heights (300mm for doors supplied with a box cover). This, coupled with very compact side runners means that the Thermaglide®77 offers a wider and higher drive-through opening, which gives you much more room to manoeuvre and means maximum storage space inside your garage.

**ARCHED DOORWAY**  
compatible with both 77 & 55

Thermaglide®77 installed behind an arched top garage

## Security as Standard

The combination of side runners and auto-positive locking with anti-lift geometry locking straps makes Thermaglide® extremely secure. Our garage doors are fully automated so there is no lock to pick or force! Rolling code technology in the control system ensures criminal "code grabbing" is eliminated.

**MORE LIGHT WITH VISION SLATS**

Thermaglide®77 including vision lath option

MAHOGANY		ROSEWOOD	GOLDEN OAK				

Please refer to **notes on colour** on page 5.

## Practical High Performance

Remote control comes as standard for effortless operation. The door is practical too - vertical travel allows "park right up" convenience inside and out and provides maximum drive through width and height for MPVs and 4x4s, gaining up to 150mm in width when replacing a conventional door and frame. It also allows the door to fit garage openings of all shapes and sizes.

- Vertically opening doors
- Fits garage openings of all shapes and sizes, even arched openings
- Made in compliance with ISO 9001 quality standard
- Fully enclosed side runners and unique 'AutoLock' self-locking feature
- Fully automated with no exterior lock to pick or force
- Rolling code technology helps prevent criminal 'code grabbing'
- Optional emergency opening system
- Hard wired and wireless safety systems available
- Alarm also supplied as an option

**Notes on Colour:** Door guides and boxes are available in colours matching the door curtain, except laminate door colours, (supplied in white). Coloured guide rails are supplied as standard, however, they may not match the lath colour. The manufacturing process for the lath profile results in a textured finish, whilst all other coloured items (guides, bottom laths, optional fascias and vision panels) are supplied in a satin finish, so cannot be guaranteed to match exactly. Over time some scuffing may occur on the front and rear surfaces of doors as a result of their normal operation. Accuracy of colours shown is limited by printing process. Please note that the colour of the bottom lath may vary slightly from the rest of the door.

# THERMAGLIDE® 55

Thermaglide®55 installed behind an arched garage

## The Compact Choice

Where headroom in your garage is especially tight, the Thermaglide® 55 has all the features of the Thermaglide® 77 but requires **only 205mm of headroom** and is available up to 2.8 metres wide and 2.4 metres high.

**All the features - only smaller!**

## Security as Standard

The slim profile of the 55mm deep lath rolls tightly and can be fitted to the exterior front face of the garage when space is particularly restricted.

Better still, the lath has horizontal profiles detailing both faces so doors fitted externally have the same attractive detailing as those fitted internally.

**Thermaglide®55 is the door that looks good inside out.**

## Looks Good Inside Out

The door can be fitted to the exterior front face of the garage, the ideal solution for flat roof garages with no internal headroom.

All finishes, with the exception of Golden Oak and Mahogany, can be fitted externally.

## The Thermaglide® Insulated Roller Garage Door offers you the Ultimate in Versatility

**Notes on Colour:** Door guides and boxes are available in colours matching the door curtain, except laminate door colours, (supplied in white). Coloured guide rails are supplied as standard, however, they may not match the lath colour. The manufacturing process for the lath profile results in a textured finish, whilst all other coloured items (guides, bottom laths, lock laths, optional fascias and vision panels) are supplied in a satin finish, so cannot be guaranteed to match exactly. Over time some scuffing may occur on the front and rear surfaces of doors as a result of their normal operation. Accuracy of colours shown is limited by printing process. Please note that the colour of the bottom lath may vary slightly from the rest of the door.

RAISING THE QUALITY - LOWERING THE PRICE

The difference is in the detail.

Polycarbonate clear glazing option is available on a proportion of the door curtain on the Thermaglide®77 only.
